CAREER OBJECTIVE

Final-year Information Technology student with a strong foundation in full-stack web development and data processing. Interested in automation systems, web scraping, and basic AI applications. Seeking an internship opportunity to participate in real-world projects and further develop professional skills in software development and data-driven systems.

EDUCATION

Thu Dau Mot University

2022 – 2027

Major: Information Technology

Scholarships: Academic Achievement Scholarship (2022, 2025)

GPA: 8.48 / 10

SKILLS

- **AI & Data Automation:** Python, Web Crawling (BeautifulSoup, Requests), Pandas, Basic LLM Integration (Groq, Llama), Basic Prompt Engineering
- **Backend Development:** Java (Spring Boot, Spring Security), Node.js (Express), RESTful APIs, JWT Authentication
- **Frontend Development:** Angular, React.js, TypeScript, HTML, CSS, Tailwind CSS
- **Databases:** PostgreSQL, SQL Server, MongoDB (basic)
- **Tools:** Git, GitHub, Postman, Docker, Google Colab
- **System Design (basic):** Microservices, Redis, RabbitMQ
- **Languages:** English (Technical Reading, Basic Communication)

PROJECTS

English Ascension – AI-Powered English Learning Platform

Apr 2026 – Present
(Personal Project)

GitHub | Live Demo

- **Technologies:** Angular, Spring Boot, PostgreSQL, JWT, Tailwind CSS, Groq API
- Developed a full-stack English learning platform with core learning and practice features.
- Integrated Groq API to support AI features such as automatic multiple-choice question generation and personalized learning path suggestions.
- Designed and implemented PostgreSQL database schemas for user and learning data management.
- Built user authentication with JWT and Google Sign-In.

Smart Boarding House Management System

Jan 2026 – Apr 2026
(Personal Project)

GitHub | Live Demo

- **Technologies:** React.js, Node.js, SQL Server, Socket.IO, Tailwind CSS
- Developed a full-stack boarding house management system supporting room, tenant, and contract management.
- Built RESTful APIs and CRUD functionalities for the backend system.
- Implemented real-time notifications and chat features using Socket.IO.
- Integrated VNPay payment gateway and email OTP verification.

ACTIVITIES

- Smart Fire Detection System (YOLOv8, IoT) – real-time detection and alert system 2026
- Digital Library with Chatbot – developed backend using Flask and REST API 2025
- Participated in TDMU Programming Contest 2022, 2023
